

HALF DAY ACCELERATION SESSION

Our half day acceleration sessions are zero-cost engagements to support development and operation teams in identifying specific areas of focus for accelerating their cloud native journeys. Led by Biqmind Specialists, the sessions help frame organizational readiness, discuss specific challenges/pain points and identify potential pilot projects to get things moving to the next level, fast.

TYPICAL USE CASES

- Transitions to managed Kubernetes platforms such as Azure Kubernetes Service (AKS) or Red Hat OpenShift(OCP)
- App modernization and innovation of legacy systems and architectures
- CI/CD pipeline design and implementation

BENEFITS

- Short and sharp session to ignite and kickstart cloud-native development and transformation
- Fresh perspective and advice on your use cases from certified specialists in relevant cloud native domains with real project experience
- Concrete actions and ideas for you to drive your cloud native project forward

Attendee Profiles

CTO/CIO and technical leads from Software, DevOps, Architecture and/or Infrastructure

Session Outcomes

- Specific conclusions, actions and next steps
- Supporting documentation

Logistics

Each session is 2 to 4 hours depending on your specific needs run virtually accommodating remote teams

ABOUT BIQMIND

Biqmind provides specialist services and software tools to accelerate cloud native software development through technologies including Biqmind CAPE, Kubernetes, and leading container platforms such as Red Hat OpenShift and Azure Kubernetes Service. We are a Red Hat APAC Business Partner for Professional Services and a Cloud Native Computing Foundation (CNCF) Silver Member. We are also one of the first partners to be invited to participate in two key Azure initiatives; Microsoft Cloud-Native Acceleration Program and Microsoft Scale Factory.
