

# Half-day Acceleration Session

Zero-cost engagements to support development and operation teams in identifying specific areas of focus for accelerating their cloud native journeys.

Led by Biqmind Specialists, the sessions help frame organizational readiness, discuss specific challenges/pain points and identify potential pilot projects to get things moving to the next level, fast.

## Typical Use Cases

- Transitions to managed Kubernetes platforms such as Azure Kubernetes Service (AKS) or Azure Red Hat OpenShift (ARO)
- App modernization and innovation of legacy systems and architectures
- CI/CD pipeline design and implementation for AKS/ARO

## Benefits

- Short and sharp session to ignite and kickstart cloud native development and transformation
- Fresh perspective and advice on your use cases from certified specialists in relevant domains with real project experience
- Concrete actions and ideas for you to drive your cloud native project forward

### Attendee Profiles:

- CTO/CIO
- Technical leads
  - Software
  - DevOps
  - Architecture
  - Infrastructure

### Logistics:

- Each session is 2-4 hours depending on your specific needs
- Can be run virtually to accommodate remote teams

### Session Outcomes

- Specific conclusions, actions and next steps
- Supporting documentation

Gold

**Microsoft Partner**

Biqmind provides specialist services and software tools to accelerate cloud native software development through technologies including Biqmind CAPE, Kubernetes, and leading container platforms such as Azure Kubernetes Service. We are a Microsoft Gold Partner and Cloud Native Computing Foundation (CNCF) Silver Member.
